

BT Clasic

Description

BT Clasic is an open-end investment fund mostly for fixed income financial instruments, a maximum level of 20% of assets being invested through the Bucharest Stock Exchange or other financial instruments. The stock exchange is used in order to optimize medium and long term revenues for our customers. BT Clasic is authorized to invest according to the risk dispersion principle up to 100% of its asset under management in securities and any other monetary instruments issued or guaranteed by the Romanian public central authorities.

The open-end fund is a product that is addressed to our low risk profile customers, especially due to the higher level of fixed income financial instruments with obvious low risk. We invite you to invest in instruments such as: *bonds, treasury bills or deposits* as well as stock exchange. Investments are made in such a way that the risks associated with them are low and yet if the capital market grows it will allow a better performance of the open-end fund. It must be known before investing that a decline of the stock exchange will have a negative effect on the investment fund. Nevertheless, judging by the range of open-end funds offered by BT Asset Management we consider that BT Clasic is a low risk fund which may provide higher returns during the increase of BSE and Rasdaq. It must be remembered that investment in fund units represents an opportunity for earnings as well as an assumed risk. Past gains do not represent a guarantee of future performance.

The funds managed by BT Asset Management are targeted towards both individual customers and companies, Romanian and foreign who do not have sufficient information to make a diversified portfolio that can reduce the risks present in operating on capital markets. The advantages of investing in our funds are the quality services we offer to our clients and our diversified portfolio that reduces the risks present in operating on capital markets and maximizes profits.

Risk profile

Because operating on the capital market is an important step on the way to becoming an entrepreneur, it is very important to know the usefulness of this product and the full characteristics of the open-end fund BT Clasic. Towards this end, we need to understand the opportunity of investing in products that contain fixed income financial instruments, as well as listed shares. The fixed income instruments give the advantage of high interest rates during recession or economic instability and the stock exchange allow higher revenues during the development of the economic environment. Thus, the deposits assure safety and listed shares may provide growth. BT Clasic offers a perfect balance between safety and risk for all our customers.

Low level of risk is the main characteristic of BT Clasic, offering a symbolic exposure on listed shares (maximum 20% of asset under management). It is a product optimal for long term saving especially if customers make successive purchases that are also constant over time.
